  Develop database, online registration, web site and perform system testing

- **DATABASE MANAGEMENT**
  Provide highly trained search operators to complete searches and ensure zero errors

- **NETWORK ADMINISTRATION**

- **PROJECT MANAGEMENT**

ADDRESSING THE NEEDS OF AGENCIES THAT PROMOTE PERMANENT FAMILIES FOR CHILDREN AND RESPONSIBLE FATHERHOOD

King Technology's online Putatuve Father Registry improves the process of notifying a biological father that his child may be the subject of an adaption proceeding, protecting the father's rights and those interested in adopting the child. The Putative Father Registry also serves families who want to adopt, adoption social workers and other professionals who must make sure that a child is "legally free" for adoption. Ultimately, the Registry benefits children because it helps determine if they are available to be adopted and expedits the process of finding them permanent families.
